

Pelican AnyWhere 4G/LTE Cellular Service

Pelican AnyWhere is the 4G/LTE cellular service offered by Pelican Wireless. We integrated a cellular modem into our GW400-LTE gateway so all you have to do is plug it into power for immediate AnyWhere cellular Internet.

No need for third-party contracts, over-charges, or buying additional data. We worked hard to make an all-inclusive solution that is easy to understand and has no surprises.

- + Flexibility and Autonomy**
Run Pelican on an integrated cellular network, eliminating the need for a hardwired Ethernet connection
- + Installation Variability and Reliability**
Place the GW400-LTE gateway anywhere in the building and connect to the Internet immediately, increasing installation convenience and wireless reliability
- + Network Isolation and Security**
Designed to meet enterprise-level security standards and will only communicate with Pelican devices
- + All-in-one Pelican Support**
The GW400-LTE and Pelican AnyWhere are designed, manufactured and supported by Pelican. Enjoy our standard, free, all-in-one support and troubleshooting services.

TERMINATION & REACTIVATION

- + Temporarily Disable Cellular Data Service for a Gateway**
By deleting the GW400-LTE from a Pelican Site, your monthly cellular data service fee will be temporarily disabled and all charges will be put on hold. You can reactivate your data service at no penalty or cost within a six (6) month period. After six (6) months of a Gateway being temporarily disabled, Pelican will permanently terminate the device from your Pelican AnyWhere account and remove it from the AnyWhere cellular network.
- + Reactivate a Permanently Terminated Gateway**
If your Gateway has not received cellular data service for six (6) months after temporarily disabling cellular data service, contact Pelican to have your Gateway reactivated onto the Pelican AnyWhere cellular network.
