

# CENTER JOINT UNIFIED SCHOOL DISTRICT

FULL DISTRICT RETROFIT  
INSTALLED SINCE 2017

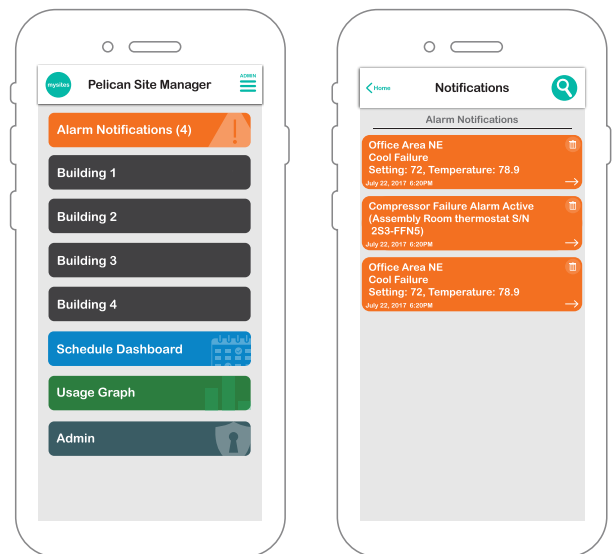

## CUTTING DOWN COMPLAINTS

Starting in 2017, Center Joint Unified School District has installed Pelican across their entire district.

They wanted to find a solution that reduces the number of complaints they were getting due to their DDC system.

They found other wireless thermostats had problems communicating across their campuses, but when they tried the Pelican solution, it was nothing but simple success. With Pelican, their HVAC equipment is operating better and with fewer complaints. Craig Deason, Assistant Superintendent, Facilities and Operations, said, "I'm not having fires to put out. I'm not hearing much—it's been quiet."

The district plans to continue modernize as they replace old and worn out equipment, and are happy with Pelican as their climate solution. "I like that I get an energy management system at a fraction of the cost of traditional controls," said Deason. "I'm looking forward to continuing getting rid of the outdated systems."
